

Corporate Affiliates Program Details

We offer a wide range of services to Affiliates of the College of Engineering and the Sciences to meet your needs. We provide access to our faculty and to students, heightened corporate visibility, a role in shaping the future of higher education and more:

Corporate Affiliates Facilitates

- Research Collaborations
- Faculty Relationships
- Access to Intellectual Property
- Recruitment of Top Talent
- Enhancing Visibility
- Facility Access
- Networking with Professionals

A Personalized Plan and Customized Service

No matter what your goal we can help you find the resource you need at UCSB. You will be served by your corporate affiliate's liaison who will facilitate your connection to campus and help you navigate the 16 departments, over 50 centers, and over 400 faculty in Engineering and the Sciences.

Connect with Top Undergraduate and Graduate Students

Whether you're looking to find great candidates for internships or full-time positions, we make it easy for you to find the right people. We provide custom recruiting. Our corporate liaison works with you to create innovative, customized and productive recruiting events at UCSB or wherever you choose

Through our senior capstone project programs you have the opportunity to work closely with graduating seniors and get a hands on look at UCSB's talent.

Partner with Internationally-Renowned Faculty

The faculty at UCSB are global leaders in materials, bioengineering, chemical, electrical, computer engineering, marine and environmental science, geography, nanotechnology, and physics. We realize there are a wide range of reasons why you would be interested in talking or consulting with our faculty, and we've created several ways to facilitate the process.

Our knowledge of the faculty helps us to quickly find the best match for your interests and arrange for face to face discussions about your research interests.

Research, Facilities and Specialized Educational Programs

The campus has many varied resources – from a brand new state-of-the-art nanofabrication facility to materials synthesis and characterization laboratories and much more. We also provide a range of specialized events, symposiums and other educational programs to meet your staff's needs.

Corporate Insight Day – Just For Your Firm

Depending on your company's specific objectives, membership as a corporate affiliate entitles you to create multiple, day long events on campus, designed to meet your unique needs. You can, for example, plan a technology overview, custom tours of labs and facilities, have detailed discussions with faculty, individualized recruiting events, or a combination of different approaches.

Heightened Corporate Visibility and Exposure on Campus

Affiliation with Engineering and the Sciences at UCSB will create a variety of opportunities for positive visibility. By becoming a member, your logo will appear on the campus' industry center web site and in key collateral and publications. In addition, your company will be recognized at Corporate Affiliate board meetings and other events.

Strategic Advisory Role

As a member of the Corporate Affiliates Program, your company is invited to place a senior executive on the Corporate Affiliates Advisory Board. The board advises the Deans of Engineering and the Sciences about industry challenges and needs.

To learn more about how your company can work with UC Santa Barbara, contact Leslie Edwards (805-893-3944/edwards@engineering.ucsb.edu) or Chris Russo (805-893-5544/crusso@engineering.ucsb.edu) in the Corporate Affiliate Programs office.
